# HUSSAM TARTEER

*FULL-STACK DEVELOPER | IEEE RAS UJ WEBMASTER*

hussamcodes@gmail.com +962 7 8835 1999 Amman, Jordan hussamtarteer.netlify.app

## SUMMARY

Full-stack developer building REST APIs with Spring Boot and reactive UIs with React, currently shipping web platforms for IEEE RAS UJ. Seeking an internship where I can contribute to real product development and grow under experienced engineers.

## SKILLS

**Backend**
Java, Spring Boot, JPA/Hibernate, Relational Databases (SQL), RESTful APIs, Object-Oriented Programming (OOP), Problem Solving, Git, Github, Linux

**Frontend**
HTML, CSS, Javascript, ReactJS

**Soft**
Adaptable, collaborative, Teamwork, communication, quick learner, passionate about web development and tech

## PROJECTS

**AI POWERED CCTV SYSTEM**
- Architected a three-layer AI-powered CCTV system — Python AI layer communicating with a Spring Boot backend via REST, with a React frontend. Implemented JWT-based authentication and handled ~15 requests/second from the Python service for near real-time image updates.

Github: https://github.com/hustarico/aeye-backend

**SMART CELL COMPANY PORTFOLIO WEBSITE**
- Developed a responsive portfolio website for Smart Cell, resulting in a professional web presence for the company.
- Collaborated in a two-person team using Git for version control and team organization.

Live website: https://ses-jo.com

**IEEE CIS JU WEBSITE**
- Contributed to development and deployment of the official IEEE CIS JU site.
- Enhanced UX and fixed bugs; used Git/GitHub for version control.

**IEEE RAS UJ WEBSITE**
- Designed and developed the official team website for IEEE RAS UJ using ReactJS, ensuring responsive clean design (currently ongoing).

Github: https://github.com/hustarico/IEEE-RAS-UJ-WEBSITE

**STREAKR — A PRODUCTIVITY STUDYING TOOL**
- Designed and shipped a client-side React productivity tool featuring streak tracking and session analytics, with state persisted in localStorage — no backend, no accounts, instant load. Live on Netlify.

Link: https://streakr-study.netlify.app

**GEEKS LEAGUE BACKEND**
- Built and deployed a Spring Boot REST API with MySQL for the IEEE CS JU Geeks League platform, serving live production traffic via Render.

Github: https://github.com/hustarico/geeksLeagueBackend

## EXPERIENCE

**Webmaster** 10/2025 – Present
*IEEE Robotics and Automation Society - University of Jordan branch*
- Orchestrating the development, launch, and maintenance of multiple IEEE RAS UJ web platforms.
- Gave multiple workshops (python, git+github, problem solving, Linux basics), guiding students learn real-life tools to help in their careers.

**Technical member** 2024 – Present
*IEEE Computer Society member - University of Jordan branch*
- Collaborated with peers on organizing tech-related events and workshops.
- Guided and mentored colleagues in their journey to learn full-stack web development.

## EDUCATION

**Bachelor's in Computer Information Systems** 2023 – Present
*University of Jordan*
GPA: Very Good
